

TECHNICAL DATA SHEET **Mute X** **MUTE-X**
Soundproof Everything™

Soundproofing system

Product Description and Technical Specification

- MuteX is made in the USA and has an STC rating of 4.
- Compact & Lightweight at only 1/4" thick and 1/4 lb/sqft
- 2 Stage Sound Barrier using Polymute Resin + Carbonweave

MuteX™ is an excellent solution for insulating buildings, offering superior noise reduction and insulation that is both competitively priced and easy to install. In buildings where multiple living units and office spaces create excessive noise that easily bleeds through walls, MuteX™ offers the protection needed to ensure privacy, comfort, and functionality.

MuteX™ is easily installed onto studs during construction for an unobtrusive drop in noise, and can be used on walls, subfloors, and ceilings for maximum noise reduction.

In addition to the drop in decibel levels, MuteX™ also creates an additional layer of insulation to minimize energy use and maximize comfort. MuteX™ works in tandem with existing wall structures and insulation for enhanced performance.
